|------------------------|-----------------------|----------------------|
| Beaujean, M., 335 | Fox, H., 217 | O'Hare, M. J., 39 |
| Berry, C. L., 129 | Fox, M., 65 | Olsen, E. G. J., 139 |
| Bloom, S. R., 301 | | |
| Cameron, H. M., 297 | Grundmann, E., 327 | Parker, D., 123 |
| Carter, R. L., 275 | Herberman, R. B., 227 | Polak, J. M., 301 |
| Coombes, R. C., 347 | | |
| Dechenne, C., 335 | Jones, C. J. P., 217 | Schlake, W., 327 |
| Dowsett, M., 159 | Laurence, D. J. R., 5 | Shaver, A., 341 |
| Drewinko, B., 341 | Mahieu, P., 335 | Skerrow, C. J., 23 |
| Dubois-Ginon, CH., 335 | Mangnall, Y., 65 | Slater, D. N., 65 |
| Duchen, L. W., 249 | Meyer, E. M., 327 | Symington, T., 263 |
| Evans, D. J., 119 | Neville, A. M., 99 | Watkins, J. F., 123 |
| Ferriss, J. B., 171 | Niedorf, H. R., 205 | Wolters, B., 205 |
| | | Yang, L-Y., 341 |

KEY WORD INDEX

- Adrenal cortex, 99
- Allograft, 335
- Amyotrophic lateral sclerosis, 249
- Analyses, 347
- Animal models of human disease, 249
- BCG, 327
- Biopsy techniques, 139
- Brain peptides, 301
- Breast cancer, 159
- Carcinogenesis, 263
- Cardiomyopathy, 139
- Cell differentiation, 40
- Cell lines, 341
- Cellular immunity, 227
- Chicken, 205
- Conn's syndrome, 99
- Continuing and terminal care, 263
- Control mechanisms in hypertension, 171
- Cushing's syndrome, 99
- Cytotoxicity, 227
- Desmosome, 23
- Diabetes mellitus, 65
- Drugs, 129
- Enzymes, 347
- Epidemiology of hypertension, 171
- Essential hypertension, 171
- Fc receptor, 123
- Fetus, 129
- Gastrointestinal hormones, 301
- Gonadal tumours, 40
- Harderian gland, 205
- Histochemistry, 327
- Hormones, 347
- Host cells in tumours, 275
- Human breast cancer, 347
- Human cancer, 263
- Human colon carcinoma, 341
- Human tumours, 159
- Hybrid cells, 123
- Hypercalcaemia, 159
- Interstitial fibrosis, 335
- Islets of Langerhans, 65
- Lymphocytes, 335
- Lymphoproliferative responses, 227
- Macrophage, 123
- Malformations, 129
- Mammary carcinoma, 5
- Mammary gland, 5
- Membrane proteins, 23
- Metastasis, 275
- Migration inhibition, 227
- Milk proteins, 5
- Monocytes, 227
- Motor neuron disease, 249
- Myocarditis, 139
- Myoepithelial cells, 205
- Neoplasm—heart, 139
- Nodules, 99
- Non-functioning lesions, 99
- Organization of cancer research, 263
- Osteolytic bone metastases, 159
- Ovary, 40
- Pathogenesis of essential hypertension, 171
- Peripheral neuroendocrine system, 301
- Placenta, 217
- Placental enzyme, 217
- Plasma cells, 205
- Plasma membrane, 23
- Progressive spinal muscular atrophy, 249
- Prostaglandins, 159
- Rosettes, 227
- Skeleton, 129
- Skin, 23
- Skin disease, 23
- Spleen, 327
- T cell area, 327
- Teratoma, 40
- Testis, 40
- Tissue culture, 341
- Training of scientific and clinical oncologists, 263
- Transplantation, 65
- Tumour-associated products, 275
- Tumour cell heterogeneity, 275
- Tumour formation, 123
- Tumour morphology, 275
- Ultrastructural localization, 217
- Viruses and motor neuron disease, 249
- Wobbler mouse, 249
